

Everything we do at Maxi-Cosi is to help new families grow into the future with confidence. Parents trust us, and we don't take that lightly—our car seats have safely carried over 60 million babies home from the hospital. We're right there with you, carrying the future.

For 35 years, Maxi-Cosi has designed real solutions to make families' lives easier. Craftsmanship matters because we're parents too. That's why our car seats, strollers, and at-home products are equipped with features to make the parenting path a little smoother.

Maxi-Cosi exceeds ASTM and governmental safety standards—because we know that your family's safety comes first.

At Maxi-Cosi, we know that the best innovations are the ones that simplify. We take great care to design each product with thoughtful details that fit into your life seamlessly and make your journey (and your day) a little easier.
